

RADO

An elegant up-and-down wall light finished in high-quality black graphite. The twin GU10 lamp holders cast light across the mounting surface, beautifully highlighting textures such as stone or brickwork. This effect looks especially striking when paired with coloured LED bulbs of your choice. The integrated PIR sensor offers a full range of adjustable features, including a 4-8 m detection range, LUX control for summer or winter settings, and an adjustable illumination time from 10 seconds up to 5 minutes.
